

WSO2 Data Analytics Server

WSO2-2018-0421

31-07-2018

Severity : Medium

CVSS Score : CVSS:3.0/AV:N/AC:L/PR:H/UI:R/S:U/C:H/I:N/A:N

AFFECTED PRODUCT

WSO2 Data Analytics Server 3.1.0

OVERVIEW

It has been identified that the ML application sends some sensitive information in a GET request where the data is transferred in query parameter.

DESCRIPTION

ML application login page of DAS 3.1.0, sends credentials in GET request as query parameters in plain text.

IMPACT

When the sensitive information is passed in query parameters, those can get exposed via server logs, browser history etc.

SOLUTION

The recommended solution is to apply the provided patch/update to the affected versions of the products.

For [WSO2 Update Manager \(WUM\)](#) Supported Products

Please use WUM to update the following products. Patches can be used in case WUM is not applicable.

Code	Product	Version
DAS	WSO2 Data Analytics Server	3.1.0

NOTES

We have already tested these updates/patches in-house. However, we strongly recommend you to test this in your development/test environments before applying to the production setups.

Thanks,

WSO2 Team
